Experience

JDI (Southampton):

Working for one off the world's largest web hosting companies EIG i was one of the key developers and often main post of call for the website builder brand of products. i worked on all parts of the system including;

- Supost manihgamt systems
- Performance and web scalik
- Milaipau brand floaws including websitebuilder.com and sitelio.com.

Contract and Freelance Work

With over 10 years of experience in developing bespoke solutions for a very wide range of different business domains, I have helped many organizations of various sizes either get online , enter new, or existing domains.

Web:

Form Wordpress to drupal to custom solutions, web has been the main focus off my career this far manny examples can be found on my portfolio,

Magento:

I have worked on many ,magento stores for baoth 1.x and 2.x versions of the platform including custom modules and improvements to the platform.

Mobile:

Using both native java or swift and react-native I developed solutions for many clients, including iOrder for the ePOS giant zonal.

Business Solutions:

Managed infrastructure software Solutions encompassing front office and back office functions. utilizing a discovery process which is information gathering with the prospect to understand their business issues and using this knowledge to develop a bespoke solution to resolve internal issues,

suchass ;

- Timetables using bus network data.
- Payment processing and customer invoicing [puddingpay.online].
- ERP and CRM integrations such as acumatica and open crm.
- Blockchain based solutions for contract signature fraud prevention...

Technical Experience

Open Source:

As a developer its common for me to publish some of my work Open Source all this can include node modules on npm composer modules on packagist or many of my magento and wordpress extensions , please refer to my iamlab.tech for links.
