Education

HND, Computer Science; Staffordshire University (Stafford)

```
 *Thesis title: The Introduction of Technology for Improved Student Planning.
```

Experience

JDI (Southampton):

Working for one of the world's largest web hosting companies EIG I was one of the key developers and often the main points of call for the website builder brad of products. I worked on all parts of the system including;

- Support and management systems

- Performance and web scalability testing
- Management of multiple brand flows including websitebuilder.com and sitelio.com.

Contract and Freelance Work

With over 10 years of experience in developing bespoke solutions for a very wide range of different business domains, I have helped many organizations of various sizes either get online, enter new, or existing domains.

Web:

From Wordpress to Drupal to custom solutions, web has been the main focus of my career thus far, many examples can be found in my portfolio on iamlab.tech

Magento:

I have worked on many, Magento stores for both 1.x and 2.x versions of the platform including custom modules and improvements to the platform. magento site I have worked on include **jessieandjames.co.uk** , **indigofurniture.co.uk**, and **saharalondon.com**

Mobile:

Using both native java or swift and react-native I developed solutions for many clients, including iOrder for the ePOS giant zonal.

Business Solutions:

Managed infrastructure software solutions encompassing front office and back office functions. utilizing a discovery process which is information gathering with the prospect to understand the clients business issues and using this knowledge to develop a bespoke solution to resolve internal issues, such as ;

- Timetables using bus network data.
- Payment processing and customer invoicing **[puddingpay.online]**.
- ERP and CRM integrations such as Acumatica Sage and Open CRM.
- Blockchain based solutions for contract signature fraud prevention.

Technical Experience

Open Source:

As a developer its common for me to publish some of my work Open Source, this can include node modules on NPM or composer modules on Packagist or many of my Magento and WordPress extensions, please refer to my [iamlab.tech] portfolio for links.

Programming Languages:

PHP: 10 + years, including supporting many technologies and frameworks;

- Laravel

- SQL

- Phalcon

- Symfony

Javascript: 5 + years using javascript for node apps and 10 + years javascript frameworks for frontend ;

- Anguler

- mythril

- React-native

- Gulp

JAVA: 10 + years, for me Java is now more common in various business solutions than a day to day;

- Spring MVC

- Android

More knowledge of **C++**, **C#**, **Go Lang**, **RUST**, **Swift **, **CFML**,
